Development & Integration: .NET / C# | Python | REST APIs | Git | Chatbot Development **Infrastructure:** Windows Server | Application Deployment & Configuration

PROFESSIONAL EXPERIENCE

Project Manager | Spine Technologies India Pvt. Ltd. | Jan 2025 – Present

- Lead end-to-end implementation and delivery of enterprise HRMS and Payroll solutions across multiple client engagements, covering scope, planning, requirements, configuration, testing, training, go-live and post-go-live support.
- Own project governance across timelines, dependencies, risks, issues, stakeholder communication and escalation management; act as a primary coordination point between clients, leadership and delivery teams.
- Coordinate cross-functional teams spanning implementation, development, support and sales to maintain delivery alignment and resolve project blockers.
- Drive requirements clarification, process mapping and solution alignment so business needs are translated into practical system configurations and implementation plans.
- Manage high-priority client escalations and operational risks, using structured follow-up, issue ownership and governance tracking to protect delivery outcomes.
- Support continuous improvement of implementation processes, trackers, SOPs and client handholding practices to improve execution consistency and adoption.

Application Specialist | Carnival Support Services India Pvt. Ltd. | Mar 2024 – Aug 2024

Enterprise application ownership | Technical governance | Vendor management | Roadmapping

- Appointed as the sole technical representative following an audit that identified multiple technical compliance concerns; took ownership of enterprise applications, issue resolution, governance and stability.

- Developed and implemented SOPs and application documentation to standardize support processes, strengthen compliance and improve operational continuity.
- Acted as the primary liaison between the organization and third-party vendors for application development, maintenance and change delivery.
- Coordinated critical application changes, streamlined workflows and led initiatives aimed at reducing downtime and improving reliability.
- Designed a 3-year roadmap for three major applications covering enhancements, maintenance priorities and compliance milestones aligned to business needs.

Regional Manager – Channel Sales | Spine Technologies India Pvt. Ltd. | Jul 2023 – Mar 2024

- Led regional channel sales strategy, partner expansion and market development, using deep product and implementation knowledge to connect technical solutions with customer needs.
- Identified and onboarded channel partners, enabled them with product knowledge and supported the full sales cycle from lead generation through closure.
- Coordinated with marketing, product and implementation teams to align commercial initiatives with business and delivery objectives.
- Used data-driven insights to refine sales processes, improve forecasting and support sustained regional growth.

Product Specialist – Implementation | Spine Technologies India Pvt. Ltd. | Mar 2023 – Mar 2024

- Delivered client implementations by tailoring product configurations, conducting product demonstrations and training users on business workflows.
- Provided hands-on troubleshooting and coordinated with development and support teams to resolve implementation issues and improve product reliability.
- Collected client feedback on product usability and performance, contributing to iterative improvements and implementation best practices.
- Built a strong foundation in customer-facing delivery and product understanding that supported progression into regional leadership responsibilities.

Business Analyst | VkidHub | May 2021 – Feb 2023

- Led stakeholder requirement workshops, prioritization and strategic roadmap discussions in a lean startup environment, translating business needs into actionable digital initiatives.
- Designed SQL-based dashboards and analytics to provide actionable insights for management decision-making and operational improvement.
- Spearheaded digital transformation and workflow automation initiatives that reduced process cycle times by 20%.
- Acted across business analysis, project coordination, system design, market research and customer support, adapting to shifting priorities in a resource-constrained environment.
- Served as a liaison between business, technical and customer-facing teams and mentored junior team members to strengthen collaboration and knowledge sharing.

Associate Business Analyst | AutoFlow Technologies (AutoFlowTech) | Feb 2021 – May 2021

- Analyzed business processes, identified inefficiencies and developed process maps that informed automation strategies.
- Gathered and validated requirements and prepared business/functional documentation for development teams.
- Coordinated workshops and stakeholder reviews across business, development and QA teams to maintain alignment.
- Supported UAT, rollout, post-implementation reviews and development of business-analysis best practices.

ISP18 Team Lead / Training Captain | Internshala | Mar 2020 – Aug 2020

- Led training-oriented responsibilities and supported learner engagement and coordination within the program environment.

Associate Software Developer | Accenture | Jul 2016 – Jul 2018

- Developed and maintained end-to-end web applications using .NET (C#) and Python, integrating front-end and back-end components.
- Designed and implemented chatbot solutions to improve customer support and engagement.
- Worked extensively with SQL, including database design, query optimization and automated backup strategies.
- Managed server setup, application configuration, deployment and post-launch maintenance for reliable enterprise application operations.
- Collaborated with cross-functional teams to align technical solutions with business requirements and software engineering best practices.

Resident Engineer | Educomp Solutions Ltd. | Sep 2014 – Apr 2016

- Provided desktop, network and end-user support, troubleshooting hardware/software issues and minimizing operational downtime.
- Configured and maintained local networks and supported reliable connectivity and system performance.
- Built strong client relationships by tailoring technical support to user needs and resolving issues with clear communication.

SELECTED DELIVERY & TECHNICAL PORTFOLIO

Enterprise HRMS Implementation Portfolio — End-to-end delivery across requirements, configuration, integrations, payroll processes, testing, training, go-live and post-go-live support for multiple clients.
